Course Description: Study of societal responses to children’s needs. Development of skills for preventing family breakdown, placing children in alternative care, and reuniting children with their families.

Course Learning Objectives: This course is designed to:
1. Enhance the student's development of a professional identity through an overview of past and current child welfare philosophies and policies; and of current practices, standards, and issues;
2. Heighten the student's sensitivity to racial, cultural and religious factors that affect the provision of child welfare services to various populations and the implication this has for practice;
3. Provide the student with a framework for understanding and critically analyzing the social and organizational systems that are responsible for the delivery of child welfare services;
4. Expand upon the student's knowledge of varying family structures, lifestyles and needs with emphasis on identifying strengths and resiliency.
5. Familiarize the student with the range of child welfare services and approaches that determine the social worker's tasks and responsibilities.

Evaluation of Learning Process and Grading:
1. Two exams--Mid-Term (June 18) and Final (July 27) are worth 20 points each for a total of 40 points.
2. Two Case analysis--Due May 25 & June 29 (20 points each for a total of 40 points). Specific content to be announced in class. The case analysis is intended to engage the student in the critical thinking process with respect to identification of problem issues; family structure, needs, and risk factors; child and family strengths, and problem-solving strategies that a social worker might use. The case is to be analyzed using a systems perspective.
3. A paper addressing/analyzing issue relevant to course content (choices to be selected in class) – July 13 (20 points). The paper is intended to focus on a macro-level issue related to child welfare (for example, teen parenting, Shaken Baby Syndrome). The issue is to be addressed in terms of prevalence, effects on children, the role of the professional social worker in addressing the issue, and implications for practice. More specific directions will be provided in class.
4. Mandatory Attendance: Students who miss 3 or more classes for whatever reasons will automatically lose 10 points off their final grade. There will be no opportunities to make up absences.
